BLUAI (<https://bluai.github.io>):

- Projects with Agence Numerique de Sante:
 - Machine Translation of Medical Terminologies,
 - Ontology Matching,
 - Medical Knowledge Extraction via Word Embeddings
- Elyas Conseil: identifying budget from project reports. The goal of this project was to try to extract the class or category of budget regarding a specific project report.

EUROPEAN PROJECTS

- **Pharos (2025–present):** Participation in the [Pharos](#) initiative (Language & Culture), focusing on the design and development of a large-scale Greek large language model (LLM). Contributions include data curation and cleaning for Greek corpora, evaluation benchmark design, and fine-tuning and instruction-tuning strategies to improve domain adaptation in Greek. Collaborating researcher with the National Technical University of Athens (NTUA).
- **ANS (2019–present):** Participation in a research project with the [Agence Numérique de la Santé \(ANS\)](#), [Paris, France](#), a French public organization, focusing on machine translation of medical texts and clinical terminologies. The project is funded by the French state (budget: €150,000) and conducted through the BLUAI company. Role: research and development for novel machine translation methods.
- **ICOS (2023):** [Towards a Functional Continuum Operating System](#), European research project funded by the European Union under the HORIZON research and innovation programme (Grant Agreement No. 101070177). Collaborating researcher at the Department of Ports and Shipping Management, National and Kapodistrian University of Athens (NKUA), within the research group of Associate Professor P. Trakadas.
- **Change2Twin (2022):** [Bringing Digital Twins to Manufacturing SMEs](#), European project funded by the European Union’s Horizon 2020 Research and Innovation Programme (Grant Agreement No. 951956). Collaborating researcher at the Department of Ports and Shipping Management, NKUA, within the research group of Associate Professor P. Trakadas.
- **AdaptPorts (2022):** [Strategic Action for the Adaptation of Ports to Climate Change](#), funded by the Green Fund under Priority Axis 3 “Research and Application – Physical Environment & Innovative Actions 2022”. Research contribution within the group of Associate Professor P. Trakadas.
- **DigiCirc (2021):** [Digital Circular Economy](#), European project funded by the European Union’s Horizon 2020 research and innovation programme (Grant Agreement No. 873468). Role: developer at CLMS.
- **Airbus (2014):** Industrial research project with Airbus on predicting aircraft *NO-GO* messages from operational logs. NO-GO messages render aircraft temporarily unavailable for flight. The study identified precursor log patterns that can serve as early indicators of future NO-GO events.
